Associate Consultant / .NET Developer

As an Associate Consultant at Lighthouse Computer Services you will be working on projects to develop technology solutions for a variety of clients in industries such as Financial Services, Healthcare, Life Sciences, Manufacturing and Higher Education. Your work is generally done at client locations in the Greater Boston and New England area in a team environment that consists of Lighthouse and Client members.

Position requirements

General Experience:

- Overall software development experience: 1+ years or participation in a college-sponsored co-op or internship program.
- Bachelor's degree in Engineering / Computer Science or Bachelors in Information Systems, required. Master's preferred.

Specific Experience:

- Exposure to one or more of the following concepts: Object Oriented Design (OOD), Service Oriented Architecture (SOA), Design Patterns
- Microsoft .NET Framework (C#, VB.NET, ASP.NET)
- Web application development (HTML, CSS, JavaScript, XML, XSLT, Web Services)
- Experience with working with relational databases and writing dynamic SQL
    - Experience with MS SQL Server, stored procedures, user-defined functions, and database design preferred
- Excellent written and verbal communication skills
- Exposure to Unified Modeling Language (UML) is a plus
- Development Languages:
    - Required
        - ASP.NET
        - VB.NET or C#
        - Microsoft T-SQL
    - Desired
        - Experience with SharePoint development, or an equivalent Portal or Collaboration platform (e.g. CommunityServer, SiteCore, Drupal/PHP, Django/Python)

Note: Experience gained in college will be considered towards meeting these requirements

Soft Skills:

- Diplomatic (all great consultants display this trait)
- Technically adept (you have current skills and are able to deploy them across a variety of projects and solutions)
- Communication (you have the aptitude to converse with customers and team members on both business and technical topics)
- Committed (to your customer, your team and your project)

Accountabilities:

- Collaborate with business analysts and solution architects to ensure understanding of business requirements.
- Review and provide feedback on functional and technical requirements and design for assigned project tasks.
- Review and provide feedback on development project estimates, assumptions, and work breakdown for assigned project tasks.
- Code software changes based on requirements and functional and technical design specifications. Proactively resolve issues in specification that will lead to quality, system performance, or architectural issues in product.
- Perform thorough unit testing on all relevant platforms as is appropriate for the particular task/project.
- Contribute to code review execution efforts.
- Adhere to coding guidelines and procedures as set forth by the application development standards and process.
- Reach out and interact with senior team members to review work to ensure high quality standards.
- Contribute to definition and adherence of specific technical design and coding best practices.
- Stay abreast of relevant new technologies and tools; identify opportunities to leverage them across Lighthouse Computer Services projects.

About Lighthouse Computer Services

Lighthouse Computer Services was founded in 1995 with the goal of building long-term technology partnerships with mid to large size Enterprises.

The Lighthouse Microsoft Technology Group (MTG) works collaboratively with customers to deliver engaging solutions leveraging Microsoft products. The Lighthouse MTG team has extensive experience in providing solutions to hundreds of customers leveraging the full suite of Microsoft's application development tools, but particularly in the areas of:

- SharePoint
- Custom Application Development
- Business Intelligence
- Cloud-based solutions including Office 365
